

## **ECM Technologies Helps the City of Phoenix Keep Phoenix Police Department Sites Cool, Healthy and Operating at Optimal Efficiency**

*Nearly 500,000 square feet of building space was successfully treated with the company's game-changing ThermaClear HVAC treatment*

**Phoenix** (March, 2023) — [ECM Technologies](https://ecm-technologies.net), the leader in HVAC efficiency and energy conservation, is proud to announce the successful completion of its ThermaClear™ HVAC treatment at 16 sites within the City of Phoenix Police Department. The treatment, which occurred between January 3, 2023, and January 20, 2023, included a total of 214 HVAC units, equaling 2,345 tons of equipment. In total, nearly 500,000 square feet of building space was treated to provide a comfortable and safe working environment for Phoenix police officers.

"ECM Technologies is proud to have been a part of this important project, which contributes to the health and safety of the City of Phoenix Police Department personnel and visitors," said ECM Technologies Managing Director David Fenton.

ECM Technologies' ThermaClear™ treatment is available for commercial and industrial buildings, including airports, hospitals, schools and government facilities. The advanced nano technology has been proven to restore lost HVAC efficiency, improve indoor air quality and reduce energy consumption, resulting in healthier and more sustainable environments. The typical ThermaClear™ payback period ranges from 12 to 36 months. One treatment is all that is needed for the life of the HVAC system and is backed by a full warranty for the remaining useful life of the equipment.
